Important Note:

Whispbar Flush Bar pictured in these instructions, also applicable for Whispbar Through Bar

1. Crossbar Preparation

1.1

- Set the bars to length (refer to the crossbar instructions for adjustment description)

1.2

- Remove clamp blocks from front crossbar legs by pressing it backwards.

2. Positioning Crossbars on Vehicle

2.1

- To install Front Crossbar pull back outer rubber door seal
- Locate threaded inserts under black spots above the front doors
- Place Front Crossbar on to the roof
- Install front clamps
- Refit clamp block ensuring that adjusting screw spigot engaged in a hole on the clamp

2.2

- Fit a fiber washer on to each button head capscrew
- Attach front clamps to the vehicle body with capscrews
- Progressively tighten the clamp block adjusting screws alternating from side to side to tension evenly
- Refit rubber seal over the clamp

2.3

- To install Rear Crossbar remove clamp block adjusting screws from crossbar feet
- Fit Rear clamps on to correct positions according to labels on them (Refer to Crossbar Instructions for details)
- Place Rear Crossbar on to the roof
- Clamps directly to edge of roof above rear windows
- Replace clamp block adjusting screws
- Progressively tighten adjusting screws. Alternate from side to side to tension evenly.

2.4

- Check that crossbars feel tight on the roof
- Refit covers to legs.

Warning Notes:

- Use these instruction in conjunction with crossbar instructions

WARNING: Check the Tightness of Screws Regularly
