

How to pack a bike in a box

In the examples below of how best to pack your bike, we have used the B&W International Bike Case. However, please be aware the various steps may vary depending on what box you have.

Remove your wheels:
Start by removing both wheels from your bicycle, there is no need to deflate your tyres.

Remove aluminium frame:
Remove the aluminium frame from within the case and position on a flat surface, with both centre struts pointing upwards.

Mount your bike to the aluminium frame:
Remove the skewers from your bicycle and insert the provided skewers through your forks, into the aluminium tubing so that your bike is held in place.

Mounting your wheels:
Mount both wheels to the upright struts of the aluminium frame, with one wheel at either side of the bicycle.

Insert bike into box:
Place the aluminium frame with mounted bicycle into the padded bike box.

Close and lock box:
Close and lock the bike box by simply pushing down the 4 flush fitting locks.
