

Jet Set Jumbo

The Jet Set Jumbo is the best in-car carrier for smaller breeds that we've seen anywhere – dogs really like it, owners really like it, and it's safe, using child-seat ISOFIX attachment points. For pets up to 15.5kg (35 lbs).

Dogs really like it: The internal black fabric is soft, warm, and cosy; this all helps dogs to settle down quickly. The claw-proof mesh panels at each end can be zipped shut or rolled up, and there's a window cover at the side which can be held open as required. The mesh also gives ultra-violet protection and darkens the interior.

Owners really like it: It's made from very tough 1800 Denier ballistic nylon, well-padded and waterproof. Dog hair and wet or dry mud will stay in the bag, not on the car seats. It's light, easy to move around, and it can't damage the car when being lifted in and out. It's held in shape with two concealed 'Forma Frame' supports, and can quickly be folded flat for storage. The supports, and the strong rigid base and top, can easily be removed so the bag can be washed.

It's safe: It's been crash-tested at 30mph and approved to rigorous USA standards. It needs to be clipped to a car's rear seat ISOFIX attachment points. The material flexed in the crash tests to absorb the kinetic energy, protecting both the dog and the humans. Unrestrained dogs could do lethal damage to themselves and human passengers; even an unrestrained 5.5kg dog (e.g. a medium-sized terrier) will fly forward in a 30mph crash with a force equivalent to 295kg.

Features

- 60cm wide x 40cm deep x 40cm high
- Top quality materials and workmanship
- Well-padded sides, Forma Frame supports
- Crash tested safety using ISOFIX attachments
- Reinforced base and top, with carrying handle
- Removable quilted liner
- Internal two point fixing collar / harness clip
- UV protecting mesh doors and side window
- All structural parts easily removed for hand washing (max 30°C)
- Useful at home and away as well as on the journey
- Easily folded flat for storage

Fitting the Jet Set Jumbo
